

# HOW TO REMOVE GRAFFITI FROM YOUR VMS SCREEN

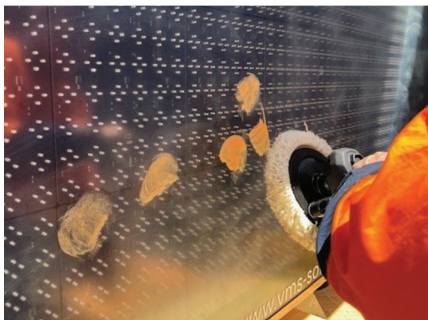

1

Example of VMS screen with graffiti.

2

Use Kitten Buffing Compound.

3

Apply compound to screen as shown.

4

Now use electric buffing tool.

5

Some work is required but buff until screen is leared as shown. Clean in sections for best results

6

After screen has been completely cleaned, apply *Dulux (or similar) clear matt coat*. Ensure it has UV stabilisation properties or clear will go yellow after exposure to Sun

Sometimes screen replacement is a better option.

Example of excessive graffiti, not practical to clean.

Example: One hour to remove this. Screen replacement is a better option.
